PROFESSIONAL SUMMARY

Junior Computer Science student-athlete at Alma College with a minor in Business Administration, a combination that lets me think both technically and strategically. Passionate about game development & design, with hands-on experience building and shipping real games from scratch, from designing environments and mechanics to scripting systems, debugging, and publishing. Udemy-certified in Roblox Studio and Lua scripting, with two original games designed, developed, and published. Actively looking to grow further in that space.

EDUCATION

Alma College (Alma, MI) *B.S.*

2023-2026

Major: Computer Science | Minor: Business Administration

GPA: 3.4/4.0

WORK EXPERIENCE

Alma College, Alma, MI

Teaching Assistant, Tutor & Mentor – French and Arabic | August 2025 – January 2026 (*Part-Time*)

- Helped students resolve technical issues with online platforms, file access, and account logins, troubleshooting problems independently and escalating when needed.
- Supported 60+ students across group and individual sessions, coordinating schedules and managing availability data using Google Forms and Excel to keep everything organized and on track.
- Communicated clearly and patiently across language barriers and varying skills levels, adapting my approach to make sure every student could follow along.

Alma College, Alma, MI

Union Board Student Assistant | February 2026 – Present (*Part-Time*)

- Designed eye-catching flyers, posters, and social media graphics using Canva to promote campus events and strengthen community engagement.
- Collaborated with team members and advisors to plan and deliver inclusive programming, balancing competing priorities and deadlines.
- Maintained organized records of event expenses and vendor agreements using Excel, supporting cost-conscious decision-making across the team.

TECHNICAL PROJECTS

Sky Obby – Roblox Game

2026

Obstacle Course Game built with Lua & Roblox Studio | Live Demo: <https://www.roblox.com/games/Sky-Obby>

- Designed and developed a 5-stage obstacle course floating above snowy mountains, each stage built around a distinct mechanic: lava mazes, moving platforms, suspended discs, and fast color-switching floors.
- Built a checkpoint system using Roblox Teams and Spawn Locations to respawn players at their last reached stage, with a persistent live timer and real-time stage label synced via Local Scripts and Remote Events.
- Added a post-game Finish area with speed discs that set each player's walk speed anywhere from 1 to 500, with the full game running cross-platform on PC, mobile, tablet, and console.

The Lost Oasis – Roblox Game

2026

Cross-Platform Game built with Roblox Studio & Lua | Live Demo: <https://www.roblox.com/games/The-Lost-Oasis>

- Designed and developed a fully playable competitive Roblox game from scratch, building a desert terrain with 20+ cacti, 2 explorable huts, and 4 oasis water pools using the Roblox Terrain Editor.
- Built a coin collection system with 25 hidden coins spread across the map, adding touch detection and real-time leaderboard logic in Lua to let players compete for the highest score.
- Built a custom in-game UI with a live coin counter and leaderboard using Roblox's GUI system and resolved cross-platform spawn and physics bugs to ensure smooth gameplay on PC, mobile, and tablet.

Library Management System

2026

Full-Stack Spring Boot Web App with RESTful API | Live Demo: <https://library-management-system.railway.app>

- Built a full-stack library system with Spring Boot, Thymeleaf, and SQLite, where users can manage books and libraries through both a REST API and a web interface with complete CRUD functionality on both ends.
- Created a relationship management page that assigns books to libraries using JPA's ManyToOne pattern, with 6 Thymeleaf templates handling the UI and automatic book count tracking for each library.
- Integrated Swagger API documentation and packaged the entire application with Docker, learning how to build layered architectures that separate data access, business logic, and presentation.

TECHNICAL SKILLS

Front-End Languages: HTML, CSS, JavaScript | **Back-End Languages:** Lua, Python, Java, SQL, C, C++, Bash

Frameworks & Libraries: Spring Boot, Flask, Django, Node.js, REST APIs, Pygame

Tools & Platforms: Git, GitHub, PyCharm, Roblox Studio, IntelliJ IDEA, Raspberry Pi, SQLite, MySQL, Excel, Linux, Windows, MacOS

RESEARCH EXPERIENCE

The Osgood Center for International Studies, Washington, D.C.

Summer 2025

Program Research Associate – Research in AI and Software Systems

- Collaborated with peers from different countries and backgrounds on research projects using Python and SQL, managing data, organizing findings, and presenting results to a mixed audience of professionals.
- Attended AI and technology conferences, gaining firsthand insight into how large organizations structure their systems and manage data at scale.
- Built working relationships with professionals across government, tech, and NGO sectors, learning how to communicate clearly and adapt my approach depending on who I was talking to.

AWARDS AND HONORS

- **Roblox Studio Masterclass – Udemy Certification – 2026**

Completed a 47-hour hands-on Roblox Studio course covering game design, Lua scripting, and client-server architecture, gaining a solid understanding of both the design and technical sides of game development, and applying everything by building and publishing two original Roblox games from scratch.

- **1st Place – Fundamentals of Web Design (BPA), Grand Rapids, MI – 2026**

Placed 1st in Fundamentals of Web Design at the Michigan Business Professionals of America 54th Annual State Leadership Conference, designing a full Porsche dealership website from scratch qualifying for Nationals in Nashville, TN.

- **Posey Global Fellowship (\$4,500), Washington, D.C. – 2025**

Competitively selected for a fully funded research internship experience with the Osgood Center for International Studies, working alongside professionals and peers from across the globe on technology and policy research.

- **Model United Nations – Delegate Recognition, Marrakesh, Morocco – 2022**

Recognized for outstanding participation as a delegate representing the Republic of Moldova in the UNEA committee at the Future We Want Model United Nations.

- **Dean's List of Fall 2024, Winter 2025, and Winter 2026, Alma College – 2024–2026**

EXTRA CURRICULAR

- *Vice President of the International Club, Alma College, Alma, MI (2026)*

Tracked and managed the club's finances for 40+ students, coordinating funding requests, keeping spending organized across multiple events and initiatives, and supporting event planning with other officers.

- *President of the Squirrel Club, Alma College, Alma, MI (2026)*

Led and coordinated all activities for the Squirrel Club of 30+ students, managing the club's budget, organizing activities and events, and collaborating with campus departments to keep things running smoothly.

- *Varsity Athlete for the Swimming and Diving Team, Alma College, Alma, MI (2025-2026)*

Balanced over 20 hours of weekly swim training and competitions with full-time academics, building strong discipline.

- *Member of Zeta Sigma Fraternity, Alma College, Alma, MI (2025-2026)*

- *Active Member of the International, French, Arabic, BPA, and Squirrel Clubs, Alma College, Alma, MI (2026)*
